Onde se lê **REF (número)** e **ADP REF (número)**, entende-se, respectivamente, **Referência (código SINAPI)** e **Adaptado da Referência (código SINAPI)**.

As composições classificadas como **REF** utilizam os **índices de consumo e produtividade do SINAPI**, aplicados aos **insumos SUDECAP**. Já as composições **ADP REF** adotam majoritariamente esses mesmos índices, porém **com adaptações** para refletir os padrões e métodos de execução da **SUDECAP**.

Quando não houver indicação de **REF** ou **ADP REF**, entende-se que as composições das **Tabelas SUDECAP** decorrem de serviços construídos a partir da experiência prática da própria **SUDECAP**, abrangendo itens que possuem características específicas ou **que ainda não foram compatibilizados com as composições do SINAPI**.

Por fim, a presença de uma referência SINAPI — seja **REF** ou **ADP REF** — **não significa adoção do preço SINAPI**. A **Tabela SUDECAP** estabelece seus valores com base em um conjunto mais amplo de fontes, incluindo:

- Preços do SINAPI;
- Outras tabelas de referência utilizadas no setor;
- Cotações de mercado;
- Convenções coletivas aplicáveis em Belo Horizonte;
- Mídia especializada;
- Portal Nacional de Contratações Públicas - PNCP;

Assim, o SINAPI funciona como **referência técnica para índices das composições**, enquanto os preços finais da Tabela SUDECAP resultam da consolidação dessas diversas fontes.

Essa tabela deverá ser vinculada ao BDI conforme disponibilizado no sítio eletrônico oficial da SUDECAP, no endereço: <https://prefeitura.pbh.gov.br/sudecap/beneficios-e-despesas-indiretas-bdi>, devendo ser observado em sua integralidade para fins de composição e atualização dos preços.

Nota: Adicionalmente, a GCUST-SD realiza a precificação, em sua maioria, sem considerar o fator de economia de escala ou, em alguns casos, considerando escala mínima, uma vez que Tabela da SUDECAP se trata de uma referência, não possuindo caráter obrigatório. Cabe ao profissional habilitado observar o disposto na Lei Federal nº 14.133/2021, com ênfase nos artigos 18º e 23º, que tratam da adequada consideração da economia de escala no planejamento e execução das contratações públicas.
